Coding questions: -

Question 1: HTML Tables & Formatting

Create an HTML page that displays the following **Student Report Card** using a table:

- Table should have a **caption**: "Student Report Card"
- First row should contain headings: *Subject, Marks Obtained, Grade*
- Add at least **3 subjects** with marks and grades
- The "**Grade**" column should be displayed in **bold**
- Add a footer row showing **Total Marks**

Requirements:

- Use <table>, <thead>, <tbody>, <tfoot>, <th>, <td>, <caption> properly
- Use formatting tags like for grade values

Question 2: Forms & Semantic Tags

Create an HTML registration form for a **Workshop Signup Page** that asks for:

1. Full Name (text input)
2. Email (email input)
3. Gender (radio buttons: Male, Female, Other)
4. Skills (checkboxes: HTML, CSS, JavaScript, Python)
5. Date of Birth (date input)
6. Upload Resume (file upload)
7. Submit button

Requirements:

- Group form inputs inside <fieldset> with a <legend>
- Use <label> tags for accessibility
- Wrap entire form inside a <main> semantic tag
- Add a <header> with a heading "**Workshop Registration Form**"
